## SECTION 04: First aid measures

- 4.1 Description of first aid measures
- General information: Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.
- After inhalation:
- Supply fresh air. If required, provide artificial respiration. Keep patient warm. Consult doctor if symptoms persist. • After skin contact:
- Immediately wash with water and soap and rinse thoroughly. Immediately rinse with water.
- After eye contact:
- Rinse opened eye for several minutes under running water.
- After swallowing:
- Do not induce vomiting; call for medical help immediately.
- Information for doctor:
- 4.2 Most important symptoms and effects, both acute and delayed
- No further relevant information available.
- 4.3 Indication of any immediate medical attention and special treatment needed No further relevant information available.

<ul> <li>Protective equipment: Mouth respiratory protective device. Do not inhale explosion gases or combustion gases.</li> <li>Additional information Cool endangered receptacles with water spray.</li> </ul>	
Do not inhale explosion gases or combustion gases. • <i>Additional information</i> Cool endangered receptacles with water spray.	
Additional information Cool endangered receptacles with water spray.	
Cool endangered receptacles with water spray.	
Collect contaminated fire fighting water separately. It must not enter the sewage system.	
ECTION 06: Accidental release measures	
6.1 Personal precautions, protective equipment and emergency procedures	
Wear protective equipment. Keep unprotected persons away.	
Ensure adequate ventilation	
6.2 Environmental precautions:     Do not allow product to reach sewage system or any water course	
Do not allow product to reach sewage system or any water course. Prevent seepage into sewage system, workpits and cellars.	
Inform respective authorities in case of seepage into water course or sewage system.	
In case of seepage into the ground inform responsible authorities.	
In case of gas release or seepage into the ground inform responsible authorities.	
<ul> <li>Do not allow to enter sewers/ surface or ground water.</li> <li>6.3 Methods and material for containment and cleaning up:</li> </ul>	
Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).	
Dispose contaminated material as waste according to item 13.	
Ensure adequate ventilation.	
6.4 Reference to other sections     See Section 7 for information on safe handling.	
See Section 8 for information on personal protection equipment.	
See Section 13 for disposal information.	
ECTION 07: Handling and storage	
Handling:	
7.1 Precautions for safe handling

<ul> <li>Additional information: The lists valid during the making were used as basis.</li> </ul>
<ul> <li>8.2 Exposure controls</li> <li>Personal protective equipment:</li> <li>General protective and hygienic measures: The usual precautionary measures are to be adhered to when handling chemicals. Do not eat or drink while working. Be sure to clean skin thoroughly after work and before breaks.</li> <li>Respiratory protection: In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device. Suitable respiratory protective device recommended.</li> <li>Protection of hands: The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Impervious gloves</li> <li>Material of gloves</li> <li>Material of gloves</li> <li>The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.</li> <li>Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.</li> </ul>
<ul> <li>The determined penetration times according to EN 374 part III are not performed under practical conditions.</li> <li>Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.</li> <li>Eye protection: Safety glasses</li> <li>Body protection: Protective work clothing</li> </ul>
