Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 - United Kingdom: Northern Ireland

# **SAFETY DATA SHEET**

TEKNOLAC COMBI 50 - All variants

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier Product name

 $\triangleright$ 

: FEKNOLAC COMBI 50 - All variants

**1.2 Relevant identified uses of the substance or mixture and uses advised againstProduct use**: Paint.

#### 1.3 Details of the supplier of the safety data sheet

Teknos Group Oy, Takkatie 3, FI-00370 HELSINKI, FINLAND. Tel. +358 9 506 091.

e-mail address of person : Prod-safe@teknos.com

#### responsible for this SDS National contact

Teknos Ireland Limited, 52 Ballymoughan Road, Magherafelt, BT45 6HN, UK. Tel. +44 (0) 2879 301 472.

#### 1.4 Emergency telephone number

National advisory body/Poison Centre

Telephone number : NHS: 111

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 STOT SE 3, H335 STOT RE 2, H373

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

Hazard pictograms

| Signal word              | Warning                                  |  |

# **SECTION 3: Composition/information on ingredients**

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[\*] The classification as a carcinogen by inhalation applies only to mixtures placed on the market in powder form containing 1% or more of titanium dioxide particles with aerodynamic diameter  $\leq$  10 µm not bound within a matrix.

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

| .1 Description of first aid measures |   |  |  |  |
|--------------------------------------|---|--|--|--|
| Eye contact                          | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.   |  |  |  |
| Inhalation                           | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If it is suspected that fumes are still present, the rescuer should wear an appropriate<br>mask or self-contained breathing apparatus. If not breathing, if breathing is irregular<br>or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel. It may be dangerous to the person providing aid to give mouth-to-mouth<br>resuscitation. Get medical attention. If necessary, call a poison center or physician.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. In case of inhalation of decomposition products in a fire, symptoms may<br>be delayed. The exposed person may need to be kept under medical surveillance<br>for 48 hours. |  |  |  |
| Skin contact                         | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |  |  |  |
| Ingestion                            | : Wash out mouth with water. Remove dentures if any. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention following exposure or if feeling unwell. Never give anything by mouth to an<br>unconscious person. If unconscious, place in recovery position and get medical<br>attention immediately. Maintain an open airway. Loosen tight clothing such as a<br>collar, tie, belt or waistband.  |  |  |  |
| Protection of first-aiders           | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.  |  |  |  |

# 4.2 Most important symptoms and effects, both acute and delayed

| Over-exposure signs/syr | <u>Over-exposure signs/symptoms</u>  |  |  |  |  |  |
|-------------------------|--|--|--|--|--|--|
| Eye contact             | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |  |  |  |  |  |
| Inhalation              | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |  |  |  |  |  |
| Skin contact            | : Adverse symptoms may include the following:<br>irritation<br>redness                     |  |  |  |  |  |
| Ingestion               | : No specific data.  |  |  |  |  |  |

#### 4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician

: K case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

### **SECTION 4: First aid measures**

Specific treatments

: No specific treatment.

# **SECTION 5: Firefighting measures**

| SECTION 5. Firelight                              | ILIII | y measures  |
|---|-------|---|
| 5.1 Extinguishing media                           |       |   |
| Suitable extinguishing media                      | :     | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                    | :     | Do not use water jet.   |
| 5.2 Special hazards arising                       | fron  | n the substance or mixture  |
| Hazards from the substance or mixture             | -     | Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion.  |
| Hazardous combustion<br>products                  | :     | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>phosphorus oxides<br>metal oxide/oxides  |
| 5.3 Advice for firefighters                       |       |   |
| Special protective actions for fire-fighters      | :     | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                                      |
| Special protective<br>equipment for fire-fighters |       | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | te | ctive equipment and emergency procedures   |
|--------------------------------|----|--|
| For non-emergency<br>personnel | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | :  | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | :  | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |
| 6.3 Methods and material for   | со | ntainment and cleaning up  |
| Small spill                    | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble.  |

contractor.

Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal

### SECTION 6: Accidental release measures

| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and  |
|---------------------------------|--|
|                                 | explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures                    | <ul> <li>Put on appropriate personal protective equipment (see Section 8). Do not breathe vapour or mist. Do not ingest. Avoid contact with eyes, skin and clothing. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. Risk of self-ignition of used cleaning rags, paper wipes etc. Contaminated materials should be soaked in water and placed in a closed metal container before disposal.</li> </ul> |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

#### Seveso Directive - Reporting thresholds

#### Danger criteria

|     | Notification and MAPP threshold | Safety report threshold |
|-----|---------------------------------|-------------------------|
| P5c | 5000 tonne                      | 50000 tonne             |

#### 7.3 Specific end use(s)

Recommendations

- : Not available.
- Industrial sector specific solutions
- : Not available.

Date of issue/Date of revision

### **SECTION 8: Exposure controls/personal protection**

required.

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

### 8.1 Control parameters

Occupational exposure limits

| Product/ingredient name | Exposure limit values  |

| 8.2 Exposure controls            |      |  |   |  |  |  |
|----------------------------------|------|--|---|--|--|--|
| Appropriate engineering controls | :    | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. |   |  |  |  |
| Individual protection meas       | ures |  |   |  |  |  |
| Hygiene measures                 | :    | before eating, smoking and using Appropriate techniques should b   | thoroughly after handling chemical products,<br>g the lavatory and at the end of the working period.<br>e used to remove potentially contaminated clothing.<br>ore reusing. Ensure that eyewash stations and<br>workstation location.   |  |  |  |
| Eye/face protection              | :    | assessment indicates this is nec<br>gases or dusts. If contact is pos  | afety eyewear complying with an approved standard should be used when a risk<br>ssessment indicates this is necessary to avoid exposure to liquid splashes, mists,<br>ases or dusts. If contact is possible, the following protection should be worn,<br>nless the assessment indicates a higher degree of protection: chemical splash<br>oggles.                     |  |  |  |
| Skin protection                  |      |  |   |  |  |  |
| Hand protection                  | :    | be worn at all times when handlin<br>this is necessary. Considering the<br>check during use that the gloves<br>should be noted that the time to<br>different for different glove manual  | loves complying with an approved standard should<br>ng chemical products if a risk assessment indicates<br>ne parameters specified by the glove manufacturer,<br>are still retaining their protective properties. It<br>breakthrough for any glove material may be<br>facturers. In the case of mixtures, consisting of<br>on time of the gloves cannot be accurately |  |  |  |
|                                  |      | Recommendations : Wear suita   | able gloves tested to EN374.  |  |  |  |
|                                  |      | < 1 hour (breakthrough time):  | Nitrile gloves. thickness > 0.3 mm  |  |  |  |
|                                  |      | 1 - 4 hours (breakthrough time):   | polyvinyl alcohol (PVA) thickness > 0.3 mm or 4H / Silver Shield® gloves.   |  |  |  |
|                                  |      | > 8 hours (breakthrough time):   | Viton® thickness > 0.3 mm gloves  |  |  |  |
|                                  |      | Wash hands before breaks and i   | immediately after handling the product.   |  |  |  |
| Body protection                  | :    | being performed and the risks in<br>before handling this product. Wh<br>wear anti-static protective clothin<br>discharges, clothing should inclu   | or the body should be selected based on the task<br>volved and should be approved by a specialist<br>nen there is a risk of ignition from static electricity,<br>ig. For the greatest protection from static<br>de anti-static overalls, boots and gloves. Refer to<br>further information on material and design   |  |  |  |

# **SECTION 8: Exposure controls/personal protection**

| •                               |   |
|---------------------------------|---|
| Other skin protection           | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |
|                                 | Filter type: A  |
|                                 | Filter type (spray application): A P  |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels. |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

| <b>SECTION 10: Stabilit</b>              | and reactivity   |          |
|--|--|----------|
| 10.1 Reactivity                          | No specific test data related to reactivity available for this product or its ingred   | dients.  |
| 10.2 Chemical stability                  | The product is stable.   |          |
| 10.3 Possibility of hazardous reactions  | Under normal conditions of storage and use, hazardous reactions will not occ   | cur.     |
| 10.4 Conditions to avoid                 | Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut braze, solder, drill, grind or expose containers to heat or sources of ignition. | t, weld, |
| 10.5 Incompatible materials              | Reactive or incompatible with the following materials: oxidising materials   |          |
| 10.6 Hazardous<br>decomposition products | Under normal conditions of storage and use, hazardous decomposition produse should not be produced.  | ucts     |

# **SECTION 11: Toxicological information**

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

#### Acute toxicity

| Product/ingredient name | Result  | Species       | Dose                      | Exposure     |
|-------------------------|---|---------------|---------------------------|--------------|
| ▼ylene                  | LC50 Inhalation Vapour<br>LD50 Oral               | Rat<br>Rat    | 21.7 mg/l<br>4300 mg/kg   | 4 hours<br>- |
| Ethylbenzene            | LC50 Inhalation Dusts and<br>mists<br>LD50 Dermal | Rat<br>Rabbit | 29000 mg/l<br>15400 mg/kg | 4 hours<br>- |
|                         | LD50 Oral   | Rat           | 3500 mg/kg                | -            |

Conclusion/Summary

: Based on available data, the classification criteria are not met.

#### Acute toxicity estimates

| Route                | ATE value     |
|----------------------|---------------|
| <b>D</b> ermal       | 3249.86 mg/kg |
| Inhalation (vapours) | 26.61 mg/l    |

### Irritation/Corrosion

| Product/ingredient name        | Result                      | Species        | Score    | Exposure      | Observation              |
|--------------------------------|-----------------------------|----------------|----------|---------------|--------------------------|
| Xylene                         | Eyes - Mild irritant        | Rabbit         | -        | 87 mg         | -                        |
| -                              | Eyes - Severe irritant      | Rabbit         | -        | 24 hours 5    | -                        |

# **SECTION 12: Ecological information**

#### **12.7 Other adverse effects**

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

#### **13.1 Waste treatment methods Product** Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Risk of self-ignition of used cleaning rags, paper wipes etc. Contaminated materials should be soaked in water and placed in a closed metal container before disposal. : 080111\*, 200127\* **European waste** catalogue (EWC) **Packaging** Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. **Special precautions** This material and its container must be disposed of in a safe way. Care should be 2 taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
